Welcome to the second edition of my casino related room key catalog and checklist. This guide is being released shortly after the previous release for two major reasons: (1) there has been a major format change to the guide, and (2) with the convention approaching, I wanted to provide as much information as possible to collectors as they search for missing keys.

The catalog consists primarily of keys from Las Vegas and other Nevada locations, with a fair amount of keys from other locations in the U.S. and the world.

Improving the Catalog

Many wonderful people have contributed information leading to this second edition and I look forward to continued help from all of you to improve future editions.

As stated before, there have been many contributors to this edition; however I feel I must specifically identify three major contributions:

Daryl and Pat Lamb have not only provided wonderful support in my efforts to put this together, but have made a major impact on the appearance of this second edition. Shortly after the

release of the first edition, Daryl contacted me regarding the layout of the catalog. I believe you will find his suggestions not only improve the appearance of the catalog but make the catalog easier to use.

Larry and Alice Kopp have given me permission to use the information they provide in their monthly card updates in this catalog. They were also kind enough to send the months I was missing.

Hal and Jan Simons have provided an absolutely incredible number of scans and notations regarding keys missing from the first edition. Their knowledge of key variations is of invaluable assistance in making this catalog as complete as possible.

I thank these and all other contributors for their continued help. Obviously while I try to provide a helpful catalog to room key card collectors, there will continue to be keys that have not been included. If you have keys in your collection that do not appear in this catalog, any information you could provide about the keys would be greatly appreciated.

## Using the Catalog

### Manufacturer Mark

The manufacturer mark and notes columns are provided to help identify the card. If the manufacturer mark column is blank (rather than having a manufacturer mark or the word “none”), more information is needed about this card. If you have this card in your collection, it would be of tremendous help if you could send a scanned image of the front and back of the card (or a photocopy) to the address at the end of this introduction.

Some manufacturer marks listed are not exact reproductions of the way they appear on the card, but a simple representation of the symbol, i.e. (I) is used to represent what actually is a capital letter “I” encircled with the name “Innovative” in very small print. Another mark used by Innovative is simply the name itself.

### Horizontal / Vertical Orientation

The H/V column refers to the orientation of the card. Is the card designed to be viewed in vertical (V) or horizontal (H) orientation? In cases where the cards could easily be viewed in either orientation, my choice of vertical or

horizontal is based upon my feeling as to what is the dominant orientation.

### Size of the Key

The Size column refers to the physical size of the card. Is the card wide (W) – the size of a typical credit card 2 1/8” x 3 3/8”, narrow (N) – 1 3/4” x 3 1/2”, or some other (O) size?

### CD # (Future Use)

The CD # column refers to upcoming CD based reference materials that will present photos of the fronts and backs of room keys (for an idea of what these will be like, check [www.roomkeyguide.com](http://www.roomkeyguide.com) for more information). While the CDs are currently under construction, the column is provided for users that wish to manually add this information once they become available. This catalog will be updated to reflect this information as the CDs are completed.

Please feel free to contact me with any questions regarding items appearing in the catalog at [silvajim@hotmail.com](mailto:silvajim@hotmail.com). Again, your input for improving future editions is greatly appreciated.
